**SAM INSTALLATIONS IN SOVIET BLOC IDENTIFIED
ON KEYHOLE MISSIONS [REDACTED]**

25X1D

This report has been prepared in response to CIA requirements C-RR4-81,532 and C-RR4-81,533, requesting information on surface-to-air-missile (SAM) sites and SAM support facilities newly identified on photography from [REDACTED]

sites, one possible SA-3, one SAM storage area, and one SAM training site had been identified on the referenced coverage. (No SAM support facilities were identified.)

Table 1 provides detailed information on each of these installations. Photographs of all 26 are also included (Figures 1-25). All of the SAM sites were observed to be of normal SA-2 or SA-3 size; therefore, site dimensions are not included in this report.

25X1D

of 14 July 1964 (the cutoff date for the study on which this report is based), 20 SA-2 SAM sites, one probable SA-2 SAM site, two SA-3
